

Book Review: A Few Great Scientists from Alfred Nobel to Carl Sagan

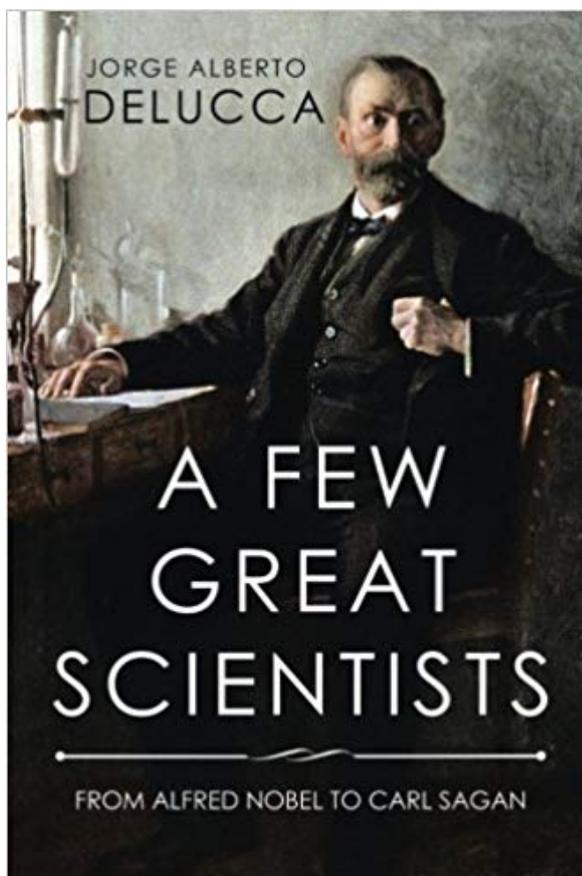

Jorge Alberto Delucca ^{1*}

¹ Moore, Oklahoma, USA

* CORRESPONDENCE: ✉ marketingservices@xlibris.com

A Few Great Scientists: From Alfred Nobel to Carl Sagan was recently published. It is written in a simple to read, and, at times, humorous style so young people will enjoy reading it. The book aims to stimulate young people to study scientific careers. In the book, there are chapters on Rachel Carson, the mother of the environmental movement, and agricultural scientist Norman Borlaug, the father of the green revolution.

It is sold on-line by Xlibris.com, Barnes & Noble, Amazon, Google Books and several other outlets; the Ebook is only \$3.99 (or less in other outlets). More information about the book is available at www.afewgreatscientists.com

Here is a review that was published in a professional newsletter:

Jorge Alberto Delucca grew up in the 60's "where the heroes in so many TV movies and comic books were scientists". He avidly read books as a teenager especially history books. With his dream to be a "true scientist" and his passion for history he became an author when he wrote "A Few Great Scientists: From Alfred Nobel to Carl Sagan". Mr. Delucca's biography of some of the world's greatest and most notable scientists was published in July 2017 and is available at all of the major online retail services in eBook, paperback and hardback format.

Mr. Delucca graduated from the College of Engineering at the University of Puerto Rico-Mayaguez with a degree in chemical engineering and was commissioned as an officer in the US Air Force in 1976. He began his career in the bioenvironmental engineering field and graduated from the course at the USAF School of Aerospace Medicine at Brooks AFB in San Antonio, Texas in 1982. He described in his book how these moves in his career kindled a fire for his love of science After retrieving a master's degree of science in environmental management from the University of Oklahoma he taught environmental science at the University of Phoenix in Oklahoma City.

Anyone who knows Jorge will tell you that he loves to tell descriptive stories. One scientist that we have heard him talk is the chemist/inventor known as Alfred Nobel. Mr. Delucca talks about the "The King of Dynamite" in his book and all of his great accomplishments. Mr. Delucca's book, "A Few Great Scientists: From Alfred Nobel to Carl Sagan", has chapters about scientists like John Von Neumann "Mathematical Genius", Jonas Salk "The Man Who Conquered Polio", Rachel Carson "Mother of the Environmental Movement", and Norman Borlaug "and His Army of Hunger Fighters" just to name a few.

Notes on contributors

Jorge Alberto Delucca is a retired US Air Force Bioenvironmental Engineer and former instructor of Environmental Science and Ethics at the University of Phoenix.
